CAREER OBJECTIVE

Software Developer with a strong interest in web development, full-stack engineering, and data-driven solutions. Focused on writing clean, efficient, and scalable code using modern development practices. Dedicated to applying skills in software engineering, AI fundamentals, and analytics to build impactful applications while continuously learning and adapting to emerging technologies.

EDUCATION

Fr. Conceicao Rodrigues College of Engineering <i>Bachelor of Engineering (B.E.) in Computer Engineering CGPA: 8.81 (upto Sem. 4)</i>	Mumbai, India Aug. 2024 – Pursuing
Vidyavardhini's Bhausaheb Vartak Polytechnic <i>Diploma in Computer Engineering 90.51%</i>	Vasai, India Sept. 2021 – June 2024
Carmel Convent High School <i>Secondary School Certificate (SSC) 94.40%</i>	Virar, India May. 2021

EXPERIENCE

IT Trainee Project Engineer <i>Webstag Technologies</i>	June 2023 – July 2023 Virar, India
- Contributed to software development activities including feature implementation, debugging, and testing following SDLC best practices - Collaborated with a cross-functional team of 3–4 members to deliver assigned modules within project deadlines - Identified and resolved 10+ bugs and issues through effective debugging and troubleshooting, improving application stability and reliability - Supported testing and validation processes, ensuring smoother deployments and reduced functional errors - Improved code readability and maintainability by adhering to clean coding standards and structured development workflows	

PROJECTS

Hospital Emergency Simulation System <i>Node.js, MySQL, HTML, CSS, JavaScript</i>	Apr. 2026 – May. 2026
- Designed and developed a full-stack hospital emergency simulation system handling 100+ concurrent patient events using DEVS modeling - Built 10+ RESTful APIs with real-time WebSocket updates, reducing patient status communication latency by 40% - Created an interactive analytics dashboard with 5+ live visualizations using Chart.js for real-time monitoring and insights - Optimized triage and queue management logic, improving emergency patient handling efficiency by 35% for critical cases - Validated system reliability through 50+ simulation scenarios, achieving over 95% accuracy in resource allocation and event scheduling	

CERTIFICATIONS

Career Essentials in Software Development <i>Microsoft and LinkedIn</i>	June 2025
TCS iON Career Edge - Young Professional <i>TCS iON</i>	Jan. 2025
Introduction to Git and GitHub <i>Coursera</i>	Aug. 2025

TECHNICAL SKILLS

Languages: Java, Python, SQL, JavaScript, HTML/CSS
Frameworks: React, Node.js, WordPress
Developer Tools: Git, GitHub, XAMPP, VS Code, Eclipse
Libraries: pandas, NumPy, Matplotlib
